100-foot folding shipping container for data centers

Overview

What are shipping container data centers?

Let's take a comprehensive look at shipping container data centers and the benefits they offer over traditional facilities. A containerized data center is a modular, prefabricated container structure that houses critical IT infrastructure. You can house servers and other IT equipment in a containerized data center.

What is a container based data center?

Container-based data centers offer commoditization of data center components and services that allow for: Mobility - Delivery and deployment of data centers in shipping containers eases shipment to new or expanded locations. Plug and play setup won't hinder your business needs after you move. Just ship it and forget it.

Do data centers stay one size forever?

Data centers don't stay one size forever. As your needs grow, so will the size and location of your data storage facility. Container data centers offer a flexible solution to rapid growth and expanding needs. Your entire mobile data center can be installed, run, and managed out of a shipping container environment that is ideal for:.
