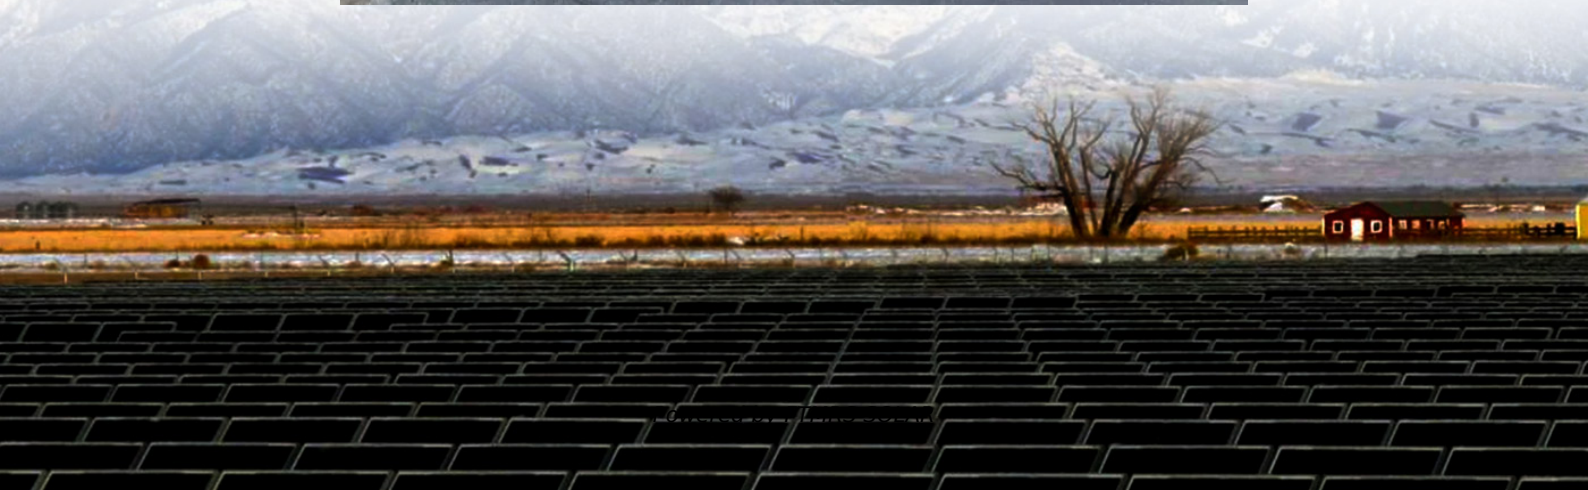
Off-grid pricing for Australian solar-powered containerized solar panels



Overview

How much does an off grid solar system cost in Australia?

But before you take the leap, understanding the Off Grid Solar System Cost is crucial. The average Off Grid Solar System Cost in Australia ranges between $25,000 and $60,000 in 2025, depending on household size and energy requirements. Here’s a quick cost breakdown:.

Are off-grid solar systems a viable option in Australia?

As the world continues prioritising sustainability and renewable energy sources, off-grid solar systems, have emerged as an attractive option for homeowners and businesses in Australia. These systems allow consumers to independently generate clean, renewable energy, reducing reliance on traditional fossil fuels and power grid networks.

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025?

According to our Energy Matters team, the average cost of an off-grid solar system for a two—to three-person home is around $25,000—$35,000. The greatest expense is the battery.

How much does an off-grid system cost in Australia?

The cost of an off-grid system for a typical Australian home (18kWh / day) ranges between $25,000 – $45,000. The price is much higher due to the amount of battery storage necessary to power your home during winter months and days of minimal solar production.
