

10MW European Energy Storage Container

Overview

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies - chemical storage, electrochemical storage, mechanical storage, and thermal storage.

Which country has the most energy storage projects?

By far, the largest number of projects are located in the United Kingdom - 66 (6,2 GW). Italy is in second place (with 13 projects totaling 1.7 GW), followed by Germany (19 - 1.6 GW), according to the inventory. European Energy Storage Inventory - projects under construction by country.

What is the energy storage inventory?

The Energy Storage Inventory is added to the existing EIRIE platform. The European Interconnection for Research Innovation & Entrepreneurship (EIRIE) Platform is an interactive multi-functional platform that acts as the meeting point for all actors in energy research and innovation from all over Europe.
