Overview

What is technical assistance for distributed energy projects?

For assistance customizing these specifications to your project's needs, please reach out through the Technical Assistance for Distributed Energy Projects portal. Provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts (GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage—an 80% increase compared to the prior year.

Are energy storage projects a meter utility scale project?

The majority of new energy storage installations over the last decade have been in front of the meter utility scale energy storage projects that will be developed and constructed pursuant to procurement contracts entered into between project developers (or a special-purpose project company owned by such developers) and the utilities.

Will changes in trade and tax policy affect energy storage projects?

Changes in trade and tax policy may increase costs and put a damper on near-term forecasted energy storage projects. On February 4, 2025, an additional 10% tariff on all goods imported from China went into effect.
