

10MW Off-Grid Solar Containerized System Used in Nicaragua Cement Plant

Overview

Can a 10MW solar power plant run a commercial establishment?

A 10MW solar power plant can run a commercial establishment independently from the Electricity grid. This size of solar farms takes up 49 to 50 acres of space and gives about 40000 kWh of low-cost electricity every day. Surplus power can subsequently be sold to the Electricity DISCOMs as per net metering mechanism of respective state government.

Why should you buy a 10MW solar power plant?

As you settle the entire cost of the 10MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

How much does a 10MW solar power plant cost in India?

On average, the cost of a 10MW solar power plant in India ranges between Rs 49 to 50 crores. Several factors influence the initial solar investment. The key component making up a solar power plant is the solar panel which comes in various forms.

What is a high capacity solar power plant?

High-capacity Solar systems of over 100kW are called Solar Power Stations, Solar Farms, Energy Generating Stations, or Ground Mounted Solar Power Plants. A 10MW solar power plant can run a commercial establishment independently from the Electricity grid.
