

# **11ac outdoor wireless base station a settings**

## Overview

---

Does AP work in 802.11ac mode?

11ac: The AP works in 802.11ac mode and only wireless devices compliant with 802.11ac can connect to the 5 GHz wireless networks of the AP. – 11a/n: The AP works in 802.11a/n mode and only wireless devices compliant with 802.11a or 802.11n can connect to the 5 GHz wireless networks of the AP.

How do I set up a wireless network?

Log in to the web UI of the AP. Navigate to Quick Setup. Set Radio Band you want to configure, which is 2.4GHz in this example. Set Working Mode to Client+AP. Click Scan. Select the wireless network to be extended from the wireless network list that appears.

How do I enable broadcast packet filter?

Log in to the web UI of the AP. Navigate to Wireless > Advanced Settings. Change the parameters as required. Click Save. Specifies whether to enable the Broadcast Packet Filter function. If this function is enabled, the AP can reduce air interface resources usage and ensure the bandwidth for business data transfer.

o Shielded Category 5 (or above) cabling should be used for all outdoor wired Ethernet connections and should be grounded through the AC ground of the PoE. We recommend that you protect your networks from harmful outdoor environments and destructive ESD events with industrial-grade, shielded Ethernet cable from Ubiquiti Networks.
