

12W Solar Street Light in Casablanca Morocco

Overview

Can LED street lighting reduce energy costs in Casablanca?

The use of LED technology for the new public lighting of the streets of Casablanca has ensured a significant reduction in energy costs thanks to the efficiency of AEC technology. Street lighting solutions guarantee greater energy savings with a clear reduction in maintenance, given the long lifespan of the LED sources that exceed 100,000 hours.

Why should we use AEC street lighting in Casablanca?

The use of AEC street lighting for the new LED public lighting in Casablanca has guaranteed great benefits in terms of cost reduction for the Moroccan Municipality. At the same time, the design of ITALO and STYLO made it possible to enhance the streets of the city by increasing their attractiveness.

Why did Casablanca use LED lights?

The municipality of Casablanca wanted to give citizens and tourists safe roads where they can travel in total tranquillity and safety thanks to a clearly visible and comfortable LED light. The LED allows you to modulate the light emission, allowing you to also analyze traffic, weather and luminance.

Why did Casablanca choose AEC Illuminazione?

AEC Illuminazione's luminaires have guaranteed the Moroccan municipality extremely low energy costs with a net reduction in CO2 emissions and light pollution. The municipality of Casablanca wanted to give citizens and tourists safe roads where they can travel in total tranquillity and safety thanks to a clearly visible and comfortable LED light.
