Overview

Will Envision Energy's 8 MWh battery fit in a 20 ft 6 m shipping container?

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) exhibition held in Shanghai. Taken from Envision Energy's website, this is a possible design configuration of its 8-MWh, 20-ft (6-m) container battery It's colossal.

How much does an energy storage system weigh?

All in, the system weighs about 55 tons (50 tonnes) To put it into simple terms, at 1,500 volts DC, it could theoretically power an average US home at 1 kW continuously for about 640 hours – a few hours shy of 27 days. Not that this energy storage system is designed for such a thing.

Where do you store solar energy?

China leads the world in terms of renewable energy resources like solar power. And not just by a small margin either, making over twice as much solar power as the next highest country, the USA. Where do you store any excess solar energy for use when the sun isn't shining?

Answer: in ridiculously big batteries.

Who makes envision battery cells?

The battery cells are produced by AESC, a Japanese company known for supplying high-performance batteries to numerous electric vehicle manufacturers. The system's inverters and battery management system (BMS) are all made in-house by Envision. Information from the EESA show about Envision Energy's 8-MWh container battery
