

250kw grid-connected inverter

Overview

What is a 40kW inverter for off-grid use?

The 40kW inverter for off-grid use features high-quality pure sine wave AC output and a 3 phase 4 wire connection. It has a no battery design, a wide DC input voltage range, an LCD display, and converts DC power to AC power in solar power systems.

What are grid-connected inverters?

Grid-connected inverters (GCI) are used to feed power from renewable energy distributed generators into the grid*. They are widely used for this purpose. Repetitive control (RC) enables such inverters to inject high quality fundamental-frequency sinusoidal currents into the grid.

What is a 10kW on-grid inverter?

A 10kW on-grid inverter is specially designed to add extra electricity to your system. It generates enough electricity to meet your daytime needs and saves excess electricity for later use at nighttime.
