

# 3000MW Solar Street Light

## Overview

---

What is a solar street light?

They consist of solar panels, LED lamps, rechargeable batteries, a remote control system, and the pole on which they are mounted. There are two designs split solar street light and integrated solar street light.

What are all in one solar street lights?

All in one solar street lights also called “ Integrated solar street lights ”, is a combination of high-efficiency solar panels, lithium batteries, LED modules, smart controllers, PIR or Motion sensors, etc. Easy to install and transport Split solar street light is divided into complete split and All in two types.

What is the battery capacity of a solar street lamp?

The battery capacity for a solar street lamp can be anywhere between 2500 mAh and 15000 mAh. And when choosing a battery, we suggest you go for one with the highest mAh. Why?

Well, there can be days when there’s no sunshine at all. And in such situations, a high-capacity battery will ensure your exterior space is well-lit at night time. Tip 4.

How to choose a solar powered street light?

Langy 500W solar powered street lights (DIY-friendly option) Tip 1. Brightness levels and area of coverage should be factored Tip 2. Choose between motion detectors vs. auto on/off based on practical considerations Tip 3. Go for a high-capacity battery Tip 4. Charging and operation time is key Tip 5. The higher the IP rating the better Tip 6.
