Overview

What is the maximum output power of a solar inverter?

With a maximum output power ranging from 23kW to 30kW, this inverter delivers reliable and efficient energy conversion for your solar system, maximizing energy generation and reducing reliance on the grid. High Efficiency: Achieve a maximum efficiency of 98.7%, maximizing energy generation from your solar panels.

How many MPPT trackers does a PV inverter have?

Flexible String Configurations: The inverter boasts up to four independent Maximum Power Point Tracking (MPPT) trackers, allowing for flexible PV string configurations and ensuring optimal energy production from diverse panel setups.

What is a 127/220 volt inverter?

This series inverter is specially designed for 127/220Vac three-phase system, especially suits for South American areas. Equipped with large LCD and buttons, easy to operate and maintenance. The startup voltage of 250V, much lower than 600V of other products, which makes the inverter start up earlier to generate more power with longer working time.
