

4MW container energy storage cabinet

Overview

What is a 4mw/2mwh containerized energy storage system?

The 4MW/2MWh containerized energy storage system was officially launched in August 2014. This system uses energy storage components based on the world's leading lifepo4 battery core technology. It consists of two lifepo4 battery modules and an AC-DC power converter connected to the grid. It operates for Ontario's independent power system.

What is ENERC+ 4mwh?

The EnerC+ 4MWH container is a modular fully integrated product, consisting of rechargeable lithium-ion batteries, with the characteristics of high energy density, long service life, high efficiency. It can provide stable energy release for over 2h when the batteries are fully charged.

What is ENERC+ energy storage?

The EnerC+ Energy Storage product is capable of various on-grid applications, such as frequency regulation, voltage support, arbitrage, peak shaving and valley filling, and demand response. In addition, EnerC+ container can also be used in black start, backup energy, congestion management, microgrid or other off-grid scenarios.

What is ENERC+ container?

7) Independent UPS. EnerC+ container have integrated two UPS system, one is for FSS monitoring system which available capacity is 24 hours, another one is for BMS which available capacity is 20 minutes The UPS is only used to supply power to BMS components.
