

# 500kWh Mobile Energy Storage Container for Construction Sites

## Overview

---

The MAX500 systems (500 kWh, 420 kW each) will charge zero-emission construction equipment and vehicles at locations where grid constraints and site logistics make fixed charging impractical. How many kWh can a 20-foot container hold?

All components for battery storage, system operation and grid connection is pre-assembled for a plug and play use. It can meet the battery storage requirements up to 1013kWh in one 20-foot container. Suitable for various applications such as peak shaving, frequency regulation, EV Charging, Solar + Storage, Micro-Grid.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

## 500kWh Mobile Energy Storage Container for Construction Sites
