

50kW Photovoltaic Container for Marine Use

Overview

What solar power systems can be used on a ship?

Integrated solar power systems for ships with Aquarius MAS and battery pack. Flexible marine grade solar panels designed for use on ships and other vessels. Solar panel accessories. Maximum Point Power Tracking (MPPT) charge controllers. Marine batteries, battery packs and energy storage solutions.

What marine solar power solutions are available?

Both these marine solar power solutions include the flexible Aquarius MAS (Management and Automation System This compact marine computer monitors the performance of a solar power array & battery pack, logs data, switches equipment on/off, calculates vessel emissions, records fuel consumption and displays system alarms.

Which batteries are best for marine solar power projects?

For most marine solar power projects EMP recommends the the UB (UltraBattery) series from Furukawa Battery and can be supplied with an easy to assemble frame mounting kit. These hybrid VRLA batteries are easy to install and have a long cycle life.

Which solar panels are suitable for marine applications?

The Ultra Battery series is also available and along with the FCP series are approved and certified for marine applications. Marine solar panels are designed to withstand the harsh conditions at sea & are suitable for all vessels ranging from small pleasure craft to ocean-going passenger ferries & cargo ships.
