

AUsPAK Uninterruptible Power Supply

Overview

What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as a UPS Power Supply, is designed to provide power to your computers, servers, server rooms and data centers in case of main energy failure, electrical surge or unexpected energy cut-off.

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What are Allen-Bradley uninterruptible power supplies?

Allen-Bradley range of Uninterruptible Power Supplies are ideal for use in Industrial processes and are available in both a standard rugged design and a networking model option with remote control.

Does 4cabling sell uninterruptible power supply products?

4Cabling sells a number of uninterruptible power supply products. The right product should support your hardware. If you don't have the right UPS for your hardware, the UPS doesn't have the capability to keep the hardware powered on. The result is your equipment loses power and users lose data.
