Overview

Could wind power be a viable energy source for Ghana?

Wind energy also holds untapped potential, particularly along Ghana's coastal regions, where wind speeds are favorable for electricity generation. Integrating wind power, solar, and battery storage solutions to complement the thermal plants could provide a stable and reliable energy supply for the country.

Can Ghana decarbonise the energy sector?

By Edward Acquah Accra, May 27, GNA- As the world races to transition from fossil fuel to renewable energy, Ghana has developed a National Energy Transition Framework (2022-2070) to decarbonise the energy sector to help achieve net zero targets as part of commitments under the Paris Agreement.

What does the new government mean for Ghana's energy sector?

New Ministry of Energy & Green Transition The new government led by H.E. John Dramani Mahama has signaled a commitment to greening the national grid by expanding the scope of the Energy Ministry to include the Green Transition in its portfolio. This marks an important policy shift towards greening Ghana's energy sector.

How is Ghana implementing the energy transition framework?

The implementation of Ghana's energy transition framework commenced with the establishment of the National Energy Transition Implementation Committee, and the National Energy Transition Coordinating Office to drive the implementation of the plan.
