Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.).

How can solar containers be used to power off-grid locations?
