

Agm battery with inverter

Overview

What types of batteries do victron inverters work with?

Victron inverter/chargers, inverters, chargers, solar chargers, and other products work with common lead-based battery technologies such as AGM, Gel, OPzS, OPzV, traction batteries and more.

What is a deep cycle AGM battery?

A deep cycle AGM battery is a type of sealed lead-acid battery designed to provide power to your solar panel system. It offers several benefits, including preventing overcharge when connected in series, requiring no maintenance, and being leakproof.

What are the different types of solar inverter batteries?

The most commonly used batteries for solar inverters are lead-acid and lithium batteries. Inverter batteries come with different chemistries and technologies, with lead-acid batteries containing four parts made of lead.

How do I choose a battery for my inverter?

When selecting batteries, it's important to ensure that the chosen battery's rated voltage is compatible with the inverter and matches the system voltage. Additionally, the depth of discharge is a critical consideration.
