

Albania goes to work on solar panels

Overview

Albania marked a significant milestone in its energy sector with the inauguration of the Karavasta Photovoltaic Park, the largest solar energy facility in the Western Balkans. Will Albania have a solar power project?

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania.

Which solar parks will boost Albania's energy production capacity?

The Karavasta solar park is one of the largest in the region and is expected to provide a significant boost to the country's energy production capacity. The Spitalla solar park, although smaller, is another important addition to Albania's growing renewable energy infrastructure.

What are the major solar projects in Albania in 2025?

Here's a closer look at some of the major solar panel projects and developments in the country as of 2025. In April 2025, Albania's Ministry of Energy and Infrastructure unveiled plans to construct a 3.3 MW solar power plant on 5.2 hectares of land in Korça.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.
