

Albanian Residential solar Systems

Overview

Will Albania have a solar power project?

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania.

What are the major solar projects in Albania in 2025?

Here's a closer look at some of the major solar panel projects and developments in the country as of 2025. In April 2025, Albania's Ministry of Energy and Infrastructure unveiled plans to construct a 3.3 MW solar power plant on 5.2 hectares of land in Korça.

Which solar parks will boost Albania's energy production capacity?

The Karavasta solar park is one of the largest in the region and is expected to provide a significant boost to the country's energy production capacity. The Spitalla solar park, although smaller, is another important addition to Albania's growing renewable energy infrastructure.

Could solar power reduce Albania's reliance on energy imports?

Albanian researchers say that solar could be key to reducing Albania's reliance on energy imports, but the nation will need to invest in grid infrastructure, streamline laws, and enhance access to funding to support deployment.
