

Amman solar panel roof BESS

Overview

How should solar panels be positioned in Amman?

In Autumn, tilt panels to 36° facing South for maximum generation. During Winter, adjust your solar panels to a 47° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 24° angle facing South to capture the most solar energy in Amman, Jordan.

Is Amman a good place to install solar panels?

The topography around Amman, Jordan is hilly and mountainous. Areas to the east of Amman, including the Zarqa Governorate and parts of the Madaba Governorate, are mostly flat and would be most suitable for large-scale solar PV installations.

How much solar power does Amman have?

Seasonal solar PV output for Latitude: 31.9555, Longitude: 35.9435 (Amman, Jordan), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 8.77kWh/day in Summer.

How to optimize solar generation in Amman Jordan?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Amman, Jordan as follows: In Summer, set the angle of your panels to 16° facing South. In Autumn, tilt panels to 36° facing South for maximum generation.
