

Are there any 5G base stations in Wellington

Overview

Will CentrePort be the country's first private 5G network?

The entire port area is set to be blanketed in 5G coverage later this year as CentrePort and Māori-run communications provider Tū Ātea team up to build what will likely be the country's first private 5G network. Set to go live in the third quarter of 2025, the network will provide dedicated, high-speed connectivity across port operations.

How will a private 5G network help port workers?

A dedicated private 5G network is expected to give port workers the connectivity they need for seamless operation across all port activities. The new network will also deliver high-speed connectivity to numerous tablets in vehicles and cranes, facilitating the handling of approximately 4 million tonnes of freight annually.

What is a 5G slicing network?

The network, scheduled to go live in Q3 2025, aims to enhance port operations by providing high-speed connectivity to devices used in managing freight, which totals around 4 million tonnes annually. The network will use 5G network slicing, offering dedicated wireless capacity for mission-critical operations.

What's going on in Tauranga's 4G optimisation?

The 4G optimisation also continues at pace, with upgrades focussed on the area dubbed the 'golden triangle' - the roading network that connects Tauranga, Hamilton and Auckland. In June, 24 new sites also went live as part of the Rural Connectivity Group project. "We are incredibly proud of our network and committed to continuous improvements.
