

Argentina wind power generation system

Overview

What percentage of Argentina's electricity is generated by wind?

Wind power accounted for 8% of Argentina's total installed power generation capacity and 10% of total power generation in 2023.

Does Argentina need more wind power?

In addition, Argentina's power grid needs significant upgrades to accommodate increased wind power generation. Despite these challenges, there is a sense of optimism in Argentina's wind energy sector. The government is actively seeking to attract foreign investment through incentives such as tax breaks and guaranteed power purchase agreements.

What is the wind power market in Argentina?

According to GlobalData, wind power accounted for 8% of Argentina's total installed power generation capacity and 10% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Argentina Wind power Analysis: Market Outlook to 2035 report. Buy the report here.

What happened to the wind sector in Argentina?

The wind sector saw a large turnaround in September 2011, when the first phase of the 77 MW Rawson Wind Power Plant I & II, the biggest in Argentina at that time, was inaugurated by Emgasud, the owner of the power plant and one of the main local investors in renewable and conventional energy projects in Argentina.
