

Australian rechargeable solar container battery prices

Overview

As of 2025, the installed price of a solar battery in Australia generally ranges from \$900 to \$2,000 per kilowatt-hour (kWh), depending on the brand, battery chemistry, and installation complexity. How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How long does a solar battery last in Australia?

With a lifespan of 10-15 years, a battery can generate \$10,000-\$15,000 in savings over its life — while protecting you from rising energy prices and blackouts. Solar batteries are becoming increasingly accessible in Australia, especially in 2025 with robust government rebates and rising energy costs.

Is a solar battery a smart upgrade for Australia's 4 million homes?

With electricity prices up 20% in NSW and Queensland since 2023, a solar battery is a smart upgrade for Australia's 4 million solar homes. The federal Cheaper Home Batteries Program slashes costs, making now the perfect time to invest.
