

# **BESS Mobile solar container outdoor power Company in Pecs Hungary**

## Overview

---

How will Hungary's subsidy scheme affect battery energy storage?

The Hungary panel discussion at the event. Image: Solar Media. Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) deployments over the next few years.

Does Hungary have a regulatory framework for co-located Bess projects?

Historically, Hungary's regulatory framework did not provide clear guidelines for the integration of co-located BESS projects. This lack of specific regulation created uncertainty for investors and developers, hampering the widespread adoption of these energy storage solutions.

Does Hungarian law support co-located Bess systems?

While the concept of electricity storage was introduced into Hungarian law earlier, comprehensive policies to support the deployment of co-located BESS systems were lacking.

Is Hungary a good market for energy storage subsidies?

Moderator Nikita Chandrashekar, director at advisory Augusta & Co, said the scheme made Hungary an attractive market: "It is probably one of the most advanced subsidies schemes to bring energy storage forward. So from a revenue perspective, perhaps, unlike some other markets, the business case in Hungary seems pretty well developed."
