

BESS price for Myanmar energy storage project

Overview

Does Solis have an off-grid battery energy storage system in Myanmar?

Solar tech leader Solis is making waves in Southeast Asia with its new energy solution — an off-grid Battery Energy Storage System (BESS) in Myanmar.

How much does a Bess system cost?

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices.

How much does Bess cost in China?

It is nonetheless still eye-opening to note just how big those differences in cost are. The average for a turnkey system in China including 1-hour, 2-hour and 4-hour duration BESS was just US\$101/kWh. In the US, the average was US\$236/kWh and in Europe US\$275/kWh, more than double China's average cost.

What is a Bess Solar System?

According to Solis, BESS is built to deliver efficient electricity from 8 a.m. to 7:30 p.m., even in less-than-ideal conditions. The system has a 450 kilowatt-peak solar capacity and six hybrid inverters — with a total output of 300 kilowatts — that help convert energy into usable electricity. BESS also boasts 668 kilowatt-hours of battery storage.
