

Base station emergency start power supply

Overview

What is a battery powered emergency system?

Battery emergency systems are compact and ensure an almost uninterrupted transition to emergency power supply. Battery powered emergency systems from PERMALUX are designed for use in critical situations where a quick switch to emergency power supply is required. Our uninterrupted power systems are ideal for locations with limited space.

What is an emergency power system?

Emergency power systems secure the power supply in the event of power failures in companies, industrial plants, hospitals, data centres and public institutions. They prevent production downtimes, data loss and security risks, and ensure compliance with legal requirements for the operation of critical infrastructure.

Why should you choose a diesel powered emergency power generator?

Our diesel powered emergency power generators guarantee a secure power source in various areas during a power outage. Whether stationary for on-site installation or as a mobile application, such as a container, we offer customized solutions characterized by robustness and reliability.
