Overview

What is Delta Battery energy storage system (BESS)?

Delta's battery energy storage system (BESS) utilizes LFP battery cells and features high energy density, advanced battery management, multi-level safety protection, and a modular design. Available in both cabinet and container options, it provides a complete and reliable energy solution.

What is an all-in-one ess cabinet?

The All-in-One ESS Cabinet is an advanced energy storage solution designed to meet the needs of modern businesses. Equipped with CATL LFP battery cells and an intelligent liquid cooling system, it provides efficient, reliable energy storage.

What are the features of ESS cabinet?

The ESS cabinet offers flexible application options. It has 0.5P and 1P options. The system uses CATL LFP battery cells. These cells provide steady and safe energy storage. This makes it a reliable solution for various business needs. The system has an intelligent EMS (Energy Management System). EMS ensures the safety of the system.

How does the ESS cabinet work?

The ESS cabinet has a quadruple fire protection system. It uses a precision fire alarm to detect risks early. The system also monitors insulation in real-time. This prevents any potential hazards. The system uses precise liquid cooling. The temperature difference remains within 4°C. This helps extend the lifespan of the battery.
