Overview

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard™ system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now.](#)

How many batteries can a batteryguard charge?

Whether you use a few batteries or many, large or small: Batteryguard offers a suitable battery cabinet for every situation. We provide compact models that allow you to charge 2 to 10 batteries simultaneously.

Why do you need a batteryguard Battery Cabinet?

A battery fire can devastate your business. With a Batteryguard battery cabinet, you charge and store your batteries with complete peace of mind. You protect your staff, prevent damage, and meet the requirements of your insurer. And in some countries, you may even benefit from financial incentives or grants.

What happens if a battery is charging inside a safe?

You're at work, your batteries are charging inside the safe - and suddenly an alarm sounds. A clear signal that something is wrong. A battery is overheating, or perhaps already on fire. Because the safe remains closed, the fire is safely contained and cannot spread. This gives you enough time to warn staff and emergency services.
