

Battery cabinet lead-acid battery configuration

Overview

Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

Should you separate lithium ion and lead-acid batteries?

If your room will house both lead-acid and lithium-ion batteries, it's good practice to physically separate these systems, especially considering their different safety and environmental requirements. The floor of a battery room must be robust and resistant to chemical corrosion.

Do lead-acid batteries need ventilation?

Ventilation is essential, particularly for lead-acid batteries emit hydrogen gas during the charging process. Hydrogen is both odourless and explosive at relatively low concentrations, so a proper ventilation system should exchange the air in the room several times per hour.

Do battery cabinets need to be locked?

Battery cabinets must enclose the batteries behind locked doors accessible only to authorized personnel. As long as the cabinets are kept locked, they can be located in a computer room or other rooms accessible by non-battery technicians.
