

Battery cabinet test system manufacturer

Overview

What types of batteries can be tested using our advanced test platform?

Our advanced test platform supports performance verification of Lithium-ion battery, Lithium-ion polymer battery, Sodium-ion battery, Lead-acid battery, Nickel-zinc battery, Nickel-metal Hybride battery, and next-generation batteries, helping battery manufacturers, R&D and Laboratories optimize battery quality.

What is a battery test bench?

These test bench solutions will allow OEMs, service providers and battery manufacturers worldwide to certify their batteries for passenger EVs and electric trucks. The expertise includes Performance & Endurance Testing, Environmental Testing and Mechanical & Abuse Testing.

What is a precision battery test system?

The Precision Battery Test System is essential for battery scientists and engineers. We ensure the necessary accuracy and efficiency to streamline the battery test process. The most popular battery tester for coin cell tests High-precision battery test with a test accuracy of $\pm 0.01\%FS$ Designed for pouch cell and cylindrical cell tests.

What types of testing can be done for a battery?

The expertise includes Performance & Endurance Testing, Environmental Testing and Mechanical & Abuse Testing. All types of batteries can be tested - from cell to module to pack and even stationary racks. Standards such as UL, IEC, UN, ISO and automotive (e.g. LV124) will also be taken into account during testing.
