

Battery pack assembly machine

Overview

What is the main business of a battery pack assembly company?

The main business is to provide solutions for the lithium battery pack assembly production line, include: battery insulation paper sticking machine, battery cell sorting machine, battery spot welding machine, battery test equipment, battery PCM tester, battery BSM tester.

What is battery pack assembly?

Battery pack assembly is the process of integrating modules into metal or carbon-fiber composite enclosures that incorporate power, charging and temperature management features. Key components include battery modules, cooling systems, power electronics and battery management systems.

What kind of equipment is used in battery manufacturing?

Our business covers cylindrical, prismatic, pouch battery pack semi-automatic&full automatic assembly machines, battery cell&pack testing systems, lab-scale fabrication machines for coin cell, cylindrical cell&pouch cell, battery environmental safety testing equipment and super capacitor production equipment, etc.

What is cylindrical battery pack semi-automatic assembly line?

This cylindrical battery pack semi-automatic assembly line is specially designed for 32140 33140 etc cylindrical battery pack production. This prismatic battery pack assembly line is used to convert square cells into fully functional battery packs or batteries to meet the power needs of various applications.
