

Battery storage prices in Slovakia

Overview

Are battery storage systems a good investment in Europe?

Battery storage systems (BESS) are poised for significantly higher profits across Europe, with Rystad Energy analysis suggesting potential increases of over 15% in some countries. The positive shift follows changes to the European Union's (EU) power pricing structure introduced in October, making the economics of BESS projects much more attractive.

What is battery energy storage system (BESS)?

This change offers Battery Energy Storage System (BESS) operators enhanced opportunities for arbitrage—buying electricity during low-price periods and selling it when prices are higher. Since its implementation, this new system has led to an average increase of 14% in arbitrage potential across European power markets.

Which countries have a higher battery price compared to other countries?

While some countries, like Austria and Slovakia, saw substantial battery price gains exceeding 20%, others, such as Portugal, Norway, and Sweden, experienced only modest increases.
