Overview

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

What is a 30kW inverter?

This is a 30kW Inverter, an efficient and highly reliable energy storage solution developed for small and medium-sized microgrids, supporting 30 kW PCS solar integration with competitive 30 kW PCS price.

How do I select a hybrid inverter?

When choosing a hybrid inverter, it's important to consider its capabilities and how they can be customized to suit your needs and preferences. To help you make an informed decision, consider consulting with an accredited solar and battery specialist like Jason Svarc, who has over a decade of experience in designing and installing solar and battery systems.

Can a hybrid inverter work with a HV battery?

Yes, most high-voltage hybrid inverters can work with a high-voltage (HV) battery, but they are often limited to the same brand as the inverter. HV batteries generally offer more continuous and peak power per kWh, which is useful if a high backup load power is needed.
