

# **Blown fuse in circuit breaker in Singapore**

## Overview

---

Can a blown fuse be switched back on?

Unlike a circuit breaker, a blown fuse can't be switched back on. To fix it, you will need to replace the fuse with one of the same amperage rating (more on this below). [Why Do Circuit Breakers Trip and Fuses Blow in the First Place?](#)

Have you ever heard the saying "too much of a good thing?"

" This is definitely the case with electricity.

Why are circuit breakers important in Singapore homes?

In Singapore homes, circuit breakers serve as crucial safety devices that protect electrical circuits from overloads and short circuits. They are the most important components of our Distribution Board (DB) Box or Electrical Panel.

What is a blown fuse?

A blown fuse occurs when a fuse in your electrical circuit gets overloaded and "breaks" to stop the flow of electricity. This is a safety mechanism to protect your home from electrical fires or damage.

What to do if a fuse is blown in Singapore?

A replacement fuse that matches the residential amperage ratings (usually 13A or 15A in Singapore). A torchlight when working under low lighting conditions. A multimeter tester to verify a blown fuse. 1. Locate the Distribution Board
