

Brussels Energy Storage New Energy Enterprise

Overview

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

How much battery storage does Belgium have?

Belgium’s battery storage buildout remains modest relative to peer nations. As of 2023, the country had under 200 MWh of operational large-scale battery capacity, compared to over 2 GWh in the UK and more than 1 GWh in Germany.

Is grid reliability a key challenge for Belgium?

As Belgium prepares for the 2025 nuclear phase-out, grid reliability is emerging as a central challenge.
