

Cambodia Power Station Generator

Overview

Why do Cambodians need diesel generators?

There is tremendous demand in Cambodia for diesel generators as backup power, on-site power plants, and power generation in rural areas not served by public utilities.

Can Sesan-II power a power plant in Cambodia?

This hydropower station could generate and supply clean energy (1970 GWh annually) which significantly contributes to Cambodia's national power grid and reduce local power shortage. In 2020, Sesan-II hydropower station generated 1696 GWh of electricity, accounting for nearly 20% of Cambodia's total domestic electricity generation.

Why should Cambodia invest in a hydropower station?

The dam has the capacity to reserve up to 2.72 billion m³ of water. This hydropower station could generate and supply clean energy (1970 GWh annually) which significantly contributes to Cambodia's national power grid and reduce local power shortage.

What is the largest hydropower project in Cambodia?

The 400 MW hydropower project, Sesan-II, is the largest hydropower project in Cambodia, located in Se San District, Stung Treng Province. The construction was executed under the approval of the Ministry of Mines and Energy (MME) in January 2014. The project was put into operation in 2017 and fully generated power in December 2018.

Cambodia Power Station Generator

Electricity infrastructure

Mar 27, 2017 · The electricity distributed in Cambodia is partly generated within the country and partly imported. For many years, local generation was on a relatively small scale, and was ...
