

# **Cambodia Solar Container 2MW**

## Overview

---

Is solar power a solution to Cambodia's energy needs?

Cambodia is undergoing a transformative shift toward renewable energy, with solar power emerging as a crucial solution to the country's growing energy demands.

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

Will solar power boost Cambodia's energy share?

Phnom Penh, Cambodia — Cambodia is on track to significantly boost its solar energy share, with new figures projecting solar to make up 7% of the country's electricity supply by 2025. This equates to a total installed capacity of 530.14 megawatts (MW) —a major leap from 3.2% in 2023 and 4.6% in 2024.

What are the key solar projects in Cambodia?

Key solar projects include: Bavet Solar Power Plant (60 MW) —Cambodia's first large-scale solar farm. Kampong Chhnang Solar Farm (100 MW) —A major investment in clean energy. Floating Solar Plant in Pursat —The country's first floating solar project, enhancing land-use efficiency.
