

Can control home solar lights at any time

Overview

Why do you need a remote control for solar lights?

Customization: A remote control gives you more control over your lighting settings. You can adjust brightness levels, set timers for on and off, and even change color temperatures depending on your needs. **Efficiency:** Remote controls allow you to control your solar lights more precisely, ensuring they are only used when needed.

How do solar streetlights work?

For greater flexibility, some solar streetlights combine light and time controls:
Light Control On + Time Control Off The light turns on at dusk based on light levels but turns off at a scheduled time. **Time Control On + Light Control Off:** The light turns on at a pre-set time and turns off based on light levels.

What should I do if my solar panels don't work?

In low-light conditions (e.g., rainy or weak lighting at night), the lights may not function as expected. Manually activate the lights if necessary to ensure safe passage. Avoid pressing buttons excessively on the remote or app to prevent equipment damage. In winter, prevent the freezing of solar panels to avoid reduced efficiency.

How do I maintain my solar panel and remote control?

Preventative Maintenance: Regularly clean the solar panel and remote control sensor to remove any dust or debris that may affect their performance. A clean surface allows for better absorption of sunlight and clear signal reception from the remote control.
