

# Can the UPS battery cabinet be placed against a wall

## Overview

---

Can ups be mounted against a wall?

Check the dimensional information on the appropriate data sheets for the floor space requirements. The UPS equipment can be mounted with the back against a wall if rear access is not specifically required; however, if side and rear access can be maintained, it may be helpful should service become necessary.

Where should the ups be installed?

The UPS installation location should be chosen with care. The type and amount of site preparation required will vary according to the specific location and its relative location to the connected load. Preferably the UPS has to be installed close to the loads.

Where should batteries be installed?

Position light fittings on walls or suspend them at least 50 cm from the ceiling, avoiding placement directly above batteries or charging units. It's best to install batteries in an open rack rather than a closed cabinet for several reasons: Open racks are better than closed cabinets for battery installation.

What is an UPS system & how does it work?

UPS systems are utilized to provide backup power to vital equipment in the case of a power loss. UPS systems can be implemented in an array of settings, include data centers, hospitals, & industrial buildings.
