What is a central inverter?

The central inverter is generally used in large power generation systems of
the desert power plants and ground power stations. The total power of the
system is large, generally above megawatts. Its main advantages include:
Fewer inverters, can be centralized installed, easier maintenance.

Why are centralized inverters so popular?

Centralized architectures are most common for larger commercial and utility-
scale projects because of first-cost efficiencies and increasing requirements
for utility interactive controls more widely available in central inverters.
