

Comoros industrial frequency pure sine wave inverter

Overview

The inverters convert 600Vdc industrial input voltage (450V to 800Vdc range) to an isolated sine wave output of 115Vac continuous at 60Hz or 400Hz, or 230Vac continuous at 50Hz. Why do you need a pure sine wave inverter?

Devices such as personal computers, laptops, network servers, and audio/visual systems are highly sensitive to power quality. A pure sine wave inverter ensures proper voltage regulation and minimizes the risk of overheating, malfunction, or reduced lifespan due to waveform irregularities.

Why do high-fidelity audio and video production studios use sine wave inverters?

High-fidelity audio and video production studios use pure sine wave inverters to prevent ground hums, signal interference, and frame disruptions. These systems require clean power for professional-grade performance in recording, editing, and broadcasting environments.

What is a pure sine wave inverter based backup system?

Inverter-based backup systems in homes must support a wide range of appliances, including refrigerators, HVAC systems, LED lighting, and security systems. Pure sine wave inverters ensure compatibility with appliances that incorporate AC motors, digital timers, or inverter-based controls.

What is pure sine wave?

Pure sine wave precisely duplicates household AC voltage. Extra heavy filtering to isolate noise from equipment sharing the same battery Suitable for any computer that requires less than 3600 watts continuous. Ultra quiet with no electrical interference. Very rugged and reliable, conformal coated electronics.
