

# **Construction of power signal base station in Indonesia**

## Overview

---

When will 630 base transceiver stations be completed in Indonesia?

File - Two workers are seen at a cell tower in Luwuk Banggai, Central Sulawesi, on March 16, 2023. (ANTARA FOTO/Yusran Uccang/aww) Jakarta (ANTARA) - Indonesia's Telecommunications and Information Accessibility Agency (BAKTI) aims to complete the construction of 630 base transceiver stations (BTS) in unforeseeable areas by the end of 2024.

When will 630 base station towers be built in Indonesia?

Indonesia's Telecommunications and Information Accessibility Agency (BAKTI) has announced that it plans to finish building 630 base station towers in remote areas by the end of this year, despite facing challenges related to accessibility and security.

Is constructing base stations a major challenge in Indonesia?

Latest Industry News: Indosat Business Announces Advanced AI Solutions for Indonesia's Oil and Gas Sector Yulis Widyo Marfiah, the acting Director of Telecommunications and Information Services at BAKTI, explained to Antara that constructing base stations in such areas is a major challenge.

How do mobile telecommunications work in Indonesia?

Mobile telecommunications specifically require infrastructure support such as telephones, mobile phones, and signal transmitters. Signal transmitters in the realm of telecommunications include BTS, typically tower-mounted in Indonesia, and signal transmitters from satellites in outer space. Both technologies are widely utilized in Indonesia,
