## Overview

---

How to promote the construction of pumped storage power stations?

To promote the construction of pumped storage power stations, it is of great significance for the construction and optimization of modern power systems.

2. Development trends of pumped storage energy in China To effectively support the construction and development of pumped storage power stations, China has issued a series of supporting policies.

Who developed pumped storage power stations in China?

Hubei Energy Group Co., Ltd., Three Gorges Construction Group Before the 14th Five-Year Plan, the development of pumped storage power stations in China was mainly carried out by power grid enterprises, namely State Grid Corporation and China Southern Power Grid Corporation.

What is a pumped storage power station?

Pumped storage power station is a kind of hydropower station with energy storage function. It uses surplus electricity during periods of low power demand to pump water from a lower reservoir to a higher one.

Which provinces have pumped storage power stations?

Analyzing the approved quantity and installed capacity of pumped storage power stations in Henan, Hubei and Hunan provinces. Analyzing the construction subject, design unit and typical technical and economic index of pumped storage projects.
