

# **Cost of a 20kW collapsible container for construction site**

## Overview

---

What are construction containers used for?

These type of containers, which are used as work offices, dormitories, dining halls, kitchens and security sites in energy, mining, oil, housing and many other construction sites, offer a fast and practical solution to construction companies.

What is a construction site container?

Herocont offers turnkey solutions for modular and prefabricated buildings, such as furniture and industrial kitchen equipment! Construction site container or construction container is a modular container, resistant to harsh conditions in various construction sites.

What are the different types of container models?

Container models vary depending on the size and needs of the construction site. Additionally, these containers can be used as dining hall containers, dormitory containers, office containers and social area containers on construction sites.

What are the dimensions of a construction container?

Construction container may have standard dimensions of 2.40×6.00m or 3.00×7.00m, depending on the conditions in the project area where the construction takes place. However, we also produce larger sizes and combined containers as needed. At the same time, we produce containers for efficiency-comfort of workforce on construction site.
