

# **Cote d Ivoire New Energy Station 215KWh**

## Overview

---

How can EDF support Ivory Coast's energy transition?

As part of its active involvement in supporting Ivory Coast's commitment to the energy transition, EDF power solutions is developing an innovative biomass power plant project in partnership with local energy players. Ivory Coast is aiming for an energy mix in which 42% will come from renewable energy by 2030.

Is Côte d'Ivoire a good place to invest in energy?

Côte d'Ivoire faces vast opportunities and serious risks as it approaches the global energy stage. With its natural wealth, the country stands to reshape its economy and become a significant player in energy and mining. However, success hinges on managing the environmental impact and avoiding the dangers of over-reliance on resources.

Will Côte d'Ivoire become a net oil exporter by 2030?

Careful management will be vital to ensuring long-term prosperity and sustainability. Côte d'Ivoire discovered 6 billion barrels of oil and gas since 2021, with production at ENI's Baleine field expected to make the country a net crude oil exporter by 2030.

Is Côte d'Ivoire a resource dependent country?

The resources play a crucial role in producing electric vehicles and other green technologies. In November 2024, Côte d'Ivoire will host its first International Extractive Industries Exhibition (SIREXE), reinforcing its commitment to the sector. The government remains cautious of the risks tied to resource dependency.
