

Cote d Ivoire power station energy storage policy

Overview

Does Côte d'Ivoire export electricity?

Côte d'Ivoire is the third largest electricity market in West Africa and has historically been a net exporter of electricity with 11.8% of its total electricity generation sold to Mali, Burkina Faso, and Ghana in 2019 (ANARE-CI, 2020).

2.1.2. Future cost assumptions Fig. 2 presents the long-term cost assumption for our analysis.

Will Côte d'Ivoire have a coal-fired power plant?

These aspects are left for further research. This coal-fired power plant is expected to be the first ever built in Côte d'Ivoire. Note that the implicit price of carbon for the other scenarios is not worth studying because they show CO₂ emissions in 2050 below the Paris Agreement target.

Does Côte d'Ivoire have a commitment to green energy?

According to its National Determined Contribution (NDC) of 2015, the share of green energy in the electricity mix is expected to reach 42% and greenhouse gas (GHG) emissions from this sector are not expected to exceed 9.2 Gt of CO₂ eq in 2030. To date, Côte d'Ivoire has not made any other quantitative commitment beyond 2030.

Will Côte d'Ivoire have a low-cost solar system?

In the case of a low-cost solar scenario, PV capacity is up to 24 GW and storage is nearly 15 GW between 2030 and 2050. In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades.
