

# Danish Smart Energy Storage Power Station

## Overview

---

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power. This project is scheduled for grid readiness by spring 2026. Who will supply Copenhagen Energy's 132 MWh Everspring battery energy storage system?

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.

Where is Better Energy deploying its first battery storage project?

Developer Better Energy is deploying its first major battery storage project, a 10MW/12MWh system, at one of its solar PV plants in Denmark.

How will a Bess project help Denmark's energy grid?

Denmark's energy grid, which has been a frontrunner in incorporating wind power, remains exposed to periods of imbalance and price fluctuation, and BESS installations will offer useful management and optimization. The Everspring portfolio, financed by Ringkjøbing Landbobank, is intended to provide flexible capacity to the Danish grid.

What is a battery storage project?

Our goal is to build an integrated business where technology, power trading, and development work together to create long-term value. Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity.
