

Discount on Three-Phase Smart Photovoltaic Energy Storage Containers for Mining

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is a 3MWh solar energy storage system?

PVMARS's 3MWh energy storage system (ESS) + 1.5MW solar energy is an off-grid microgrid solution. Solar panels themselves cannot store a lot of electricity, so the system uses photovoltaic panels to generate electricity during the day. It delivers power to your electrical equipment through the PCS and enables the ESS to store excess solar power.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How does pvmars solar IoT work?

With PVMARS solar IoT, through your phone or computer view real-time performance data of your solar system, such as solar panel power generation, battery capacity, etc., and receive timely maintenance and safety alerts to extend the life of your solar system. At the same time, your dedicated engineers will help you adjust the data through IOT.
