

Dublin Battery Storage Trends

Overview

The Single Electricity Market (SEM) on the island of Ireland is set for a battery storage boom, with short-to-medium duration capacity forecast to increase fivefold by 2030, according to Cornwall Insight. How much battery storage do we need in Ireland & Northern Ireland?

In 2021 energy experts Baringa estimated that to hit the 80 per cent renewable electricity targets in Ireland and Northern Ireland by 2030 we would need at least 1,700 MW of battery storage on the island of Ireland. Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power.

Is Ireland set for a battery storage boom?

Battery storage capacity forecasts for the Single Electricity Market (SEM) Image: Cornwall Insight From ESS News The Single Electricity Market (SEM) on the island of Ireland is set for a battery storage boom, with short-to-medium duration capacity forecast to increase fivefold by 2030, according to Cornwall Insight.

What types of batteries can be stored in Ireland?

These include lithium-ion batteries, hydrogen storage, thermal storage, flow batteries and pumped hydro storage. However, thermal storage fell outside of the focus on electricity storage and the potential for additional pumped hydro storage in Ireland is considered to be fairly limited and so neither were modelled in detail.

Will Ireland's battery storage capacity reach 13.5 GWh in 2025?

Cornwall Insight calculates that Ireland's battery storage capacity will reach 13.5 GWh by 2030, up from 2.7 GWh in 2025. Battery storage capacity forecasts for the Single Electricity Market (SEM) Image: Cornwall Insight From ESS News
